

Hyundai Maintenance Brochure Display—Assembly Instructions

The Hyundai maintenance brochure display has a flexible design so it can be placed on a counter, table top or wall mounted depending on your preference and needs. Where space is an issue each of the four interlocking brochure racks can be free standing. An optional mini header card is available.

< Before

After >

Parts list:

- 1-Plastic header board with insert card, wrapped in blue film
- 4-three tiered individual brochure display racks
- 8-screws mounted to the header board
(wall mounting screws, not included)

Tools required:

- Screw driver
- Drill and Drill Bit for wall mounting

ASSEMBLY INSTRUCTIONS

To assemble as one unit

skip steps A-F if you are using the brochure racks individually.

A. Locate the (4) three-tiered racks. Remove the brochures from the racks and line up each rack, in the same direction, on a sturdy surface.

Each display rack has a tongue and groove side.

B. Lift one of the racks high enough to clear the tongue and groove of each display rack. Gently align the tongue and groove from each display rack and push the rack down until it interlocks with the next rack.

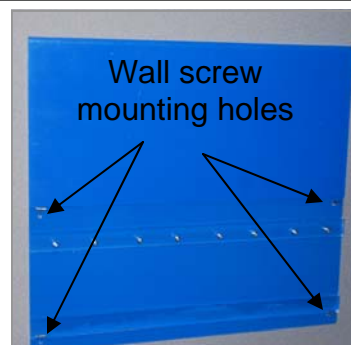

Repeat this step for the remaining individual display racks.

C. For Wall Mounting

skip this step if display will be placed on a counter top or other flat surface.

Determine location to mount the display, locate the header board and pre-mark the wall through the wall screw mounting holes located above and below the screws in the header board.

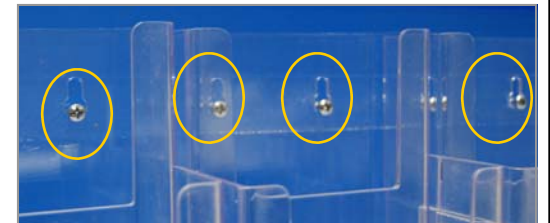

Drill holes in wall, using appropriate wall mounting screws (not included), remove the blue protective film and mount header board on the wall.

D. Locate the header board, remove the blue protective film.

Align the screws on the header board with the holes on the back of interlocked brochure racks and push screws through the holes.

E. Tighten screws so they provide a snug fit to prevent the header board from moving if accidentally bumped.

F. Locate the shrink wrapped brochures, remove shrink wrap and place entire contents into one of the tiers, repeat until all brochures are in the display rack.

G. To use the brochure displays individually

1. Locate the (4) three tiered displays racks
2. Place in desired location
3. Remove brochures from the display racks, remove shrink wrap, place brochures back into an empty tier of the display rack
4. Store Header Board for future use
5. Optional mini header cards are available for each display from Hyundaidealer.com. Select Print on Demand.

H. A reorder card is provided at the back of each set of brochures, using a pen, place a check mark next to the name of the brochure and place at the back of those brochures, for easy reordering when a brochure slot becomes empty.

Congratulations

Your new Hyundai display is ready to use. The brochures are designed to help you inform customers about service maintenance available for their Hyundai.

Replacement brochures can be reordered through the Hyundaidealer.com and selecting Print on Demand.

The service maintenance brochure display is designed for use in the service department, waiting areas or any other location you may deem appropriate to promote awareness of proper car care.
